LANGUAGES AND TECHNOLOGIES

Languages and Tools: JavaScript, HTML, CSS, ReactJS, React Native, C++, NodeJS, Java, GDScript

Developer Tools: Visual Studio, CLion IDE, Git, Github, Supabase, Firebase, Rest APIs, Arduino, Godot, Redux

EDUCATION AND ACHIEVEMENTS

Loyola Marymount University | Bachelor's Degree | 2024 - 2026

Glendale Community College | Associate Degree | 2022 - 2024

Armenian Engineers and Scientists Association member | Club Member | 2023 - 2024

TUMO Center for Creative Technologies | Certificate | 2017 - 2019

PROFESSIONAL EXPERIENCE

Snap Engineering Academy Scholar | Snap Inc | 06/24 - 08/24

- Developed a functional prototype of a feature targeting 414 million daily users, addressing issues in food security.
- Collaborated with a team of 2 designers, 3 marketers, and 1 engineer to integrate the feature across Snapchat.
- Implemented user authentication, data storage solutions, and safety measures, ensuring secure and scalable access for users.

Team Internship Program Intern | USC Institute for Creative Technologies | 02/24 - 05/24

- Designed a prototype of a button for IOS and Android app for veterans with a team of 5 which performs emergency actions on life threatening situations.
- Conducted extensive testing of user flows to optimize the feature's design for integration into the existing mobile application framework.
- Implemented additional accessibility solutions for over 2 million veterans with hearing and vision disabilities.

Math Instructor | Mathnasium Learning Center | 09/22 - 05/24

- Mentored students aged 5-17 in math skills by simplifying complicated concepts, improving their test scores by multiple letter grades.
- Developed innovative strategies for managing kids who struggled with learning disabilities.
- Created a supportive and engaging learning environment, encouraging students to build confidence in their math abilities.

PROJECTS

Hive - Prototype feature for Snapchat | [Link](#)

- Technologies Used: *React Native, Supabase, Google Maps API*
- Gained experience in integrating backend services and managing state in mobile applications.
- Implemented ability for users to share pins and deals about food resources on Snapchat Map's Screen.

ArmeniaGo - Platform showcasing places to visit in Armenia | [Link](#)

- Technologies Used: *JavaScript, HTML, CSS*
- Gained skills in designing intuitive user interfaces and managing local storage for personalized experiences.
- Implemented ability for users to switch between categories based on interests, and to save places locally on their devices.

Kinoman - Trivia Game for movie enthusiasts | [Link](#)

- Technologies Used: *ReactJs, Rest APIs*
- Enhanced proficiency in handling dynamic content and user interaction through integration with Rest APIs.
- Implemented ability for users to skip question, get hints, and play bonus trivia games with chosen category.
